

200 South Bus Stop Improvements

Dear Community Members and UTA Riders

UTA is pleased to announce plans to improve all bus stops on the 200 South Corridor this upcoming year.

This corridor connects FrontRunner, TRAX, University of Utah, numerous businesses, schools, and community centers.

Each bus stop will be made ADA compliant to better serve persons with disabilities and be equipped with waiting shelters and benches.

When construction starts these improvements should take one month to complete. Shelters will be installed throughout the year.

This project will improve our service for over 3,500 riders a day.
